SilkRoad TECHNOLOGY

Our Integration Approach

Partnering with client stakeholders (HR, Finance, IT, Marketing) we review tasks, workflows and data handling requirements to ensure clean and complete data collection and management. We create and agree upon the proposed data flow and field mapping details, documenting transformations and validations, and prepare a project plan of activity to track time and resources.

No additional software is required for a client to build, install or maintain.

Security

SilkRoad uses CIS TOP 20, NIST and the ISO 27000 family of information security standards as the framework of our security practice to preserve confidentiality, integrity, and availability. These policies and practices are evaluated semi-annually thru internal review and annually by an independent SOC 2 audit.

Our Authentication is Compliant with SAML 2.0

Clients using Single Sign-On (SSO) will have their own Identity Provider ("IDP") system. This may take the form of on-premise Active Directory or could be managed by a third party.

ACCORDING TO GARTNER:

"By 2020, 30% of global midmarket and large enterprises will have invested in a cloud-deployed HCM suites. However, they will still need to source 20% to 30% of their HCM requirements via point solutions." *– Sharon George, Gartner, Oct 30, 2018*

SILKROAD.COM

SilkRoad Technology enables people to thrive in a changing workplace. Our software and services platform help our clients attract, retain and align people to their business. Our solutions start with Global Client Services to provide strategic HR and business expertise. SilkRoad Technology then designs secure solutions tailored to business requirements at scale for global companies. We deliver personalized experiences for employees to drive engagement across the employment lifecycle and enable measurable and better business outcomes.
